INVESTMENT OBJECTIVE

The primary investment objective of the Fund is to seek current income that is exempt from federal income tax. A secondary objective is to seek total return with relatively low volatility of principal.

INVESTMENT PHILOSOPHY

Risk control is the foundation of the Baird Advisors investment discipline. Since interest rates are extremely difficult to consistently forecast over time, Baird Advisors employs a duration-neutral, risk-controlled approach. We target the duration of the Fund to the Bloomberg Quality Intermediate Municipal Bond Index, thus helping to ensure a high degree of predictability in tracking benchmark returns.

INVESTMENT STRATEGY

The Fund invests principally in investment grade, intermediate-term municipal obligations issued by state and local authorities. The Fund normally invests at least 80% of its net assets in municipal bonds and debentures, the income from which is exempt from federal income tax (including the federal alternative minimum tax). To achieve its quality and preservation of capital objectives, the Fund primarily invests in pre-refunded bonds, general obligations and essential service revenue issues.

Baird Advisors attempts to keep the duration of the Fund's portfolio equal to the duration of the Fund's benchmark. The dollar-weighted average portfolio effective maturity of the Fund will normally be more than three years but less than eight years during normal market conditions. The Fund may invest in debt securities of all maturities.

Municipal securities may or may not be appropriate for all investors, especially for those in lower tax brackets.

Because the Fund may invest more than 25% of its total assets in municipal obligations issued by entities located in the same state or the interest on which is paid solely from revenues of similar projects, changes in economic, business, or political conditions relating to a particular state or types of projects may have a disproportionate impact on the Fund.

All investments carry risk, including loss of principal. In a rising interest rate environment, the value of fixed-income securities generally decline and conversely, in a falling interest rate environment, the value of fixed income securities generally increase.

Indices are unmanaged and direct investment is not possible.

Effective 9/1/2015, the Fund's benchmark was updated to the Bloomberg Quality Intermediate Municipal Bond Index. From 3/31/2001 to 8/31/2015, the Fund's benchmark was the Barclays 7-Year General Obligation Bond Index.

¹The SEC 30-Day Yield reflects the rate at which the fund is earning income on its current portfolio of holdings after expenses.

²The quality profile is calculated on a market value-weighted basis. Per the Baird Funds prospectus, each security in the Fund is assigned the highest credit quality rating provided by a nationally recognized statistical rating organization (e.g. S&P, Moody's, Fitch). For pre-refunded securities, the reported credit quality reflects the highest reported rating from S&P, Moody's or Fitch for the underlying collateral. Per the Bloomberg Index controlling rating methodology, each security in the index is assigned a rating using S&P, Moody's, and Fitch (middle of three ratings, lower of two ratings, or singular rating if rated by one rating agency). Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest).

³Totals sum based on unrounded data. Breakouts are shown rounded to the nearest tenth and may not visually sum.

Baird Funds are offered through Robert W. Baird & Co., a registered broker/dealer, member NYSE and SIPC. Robert W. Baird & Co. also serves as investment advisor for the Fund and receives compensation for these services as disclosed in the current prospectus.
